British Citizen

Committed Data Engineer with 10+ years of experience across a broad range of programming languages and technologies. Proficient in cloud platforms such as Amazon Web Services (AWS), Multiple programming languages (Java, Scala, Kotlin, Python), and both SQL and NoSQL databases including DynamoDB, Apache Cassandra, and Elasticsearch. Maintains a technical blog and personal projects related to various topics including Data and Artificial Intelligence/large language models.

Work

June 2019 **Lead Data Engineer**, *Holland & Barrett*

to Founding member of the Data Engineering team, working to create and maintain purpose built Data solutions
Present including a Data Lake, and Data Warehouse.

Designed and maintained bespoke data extractions solutions for migrating from legacy systems including Oracle and IBM AS/400 databases.

Responsible for ELT/ETL jobs for various systems, working alongside multiple teams across the business, including Data Science and Business Intelligence, and Platform Engineering.

Mentored junior Data Engineers, supporting both technical growth and career development.

Created both traditional and LLM/Agentic tools to improve workflows and deliver improvements to the wider data platform.

Designed and built a scalable Right-to-Erasure system for customer data stored in a Data Lake.

Primary technologies:

- | | | | |
|------------------|----------------|-----------------------------|--------------|
| ○ Scala | ○ AWS Lambda | ○ Other Amazon Web Services | ○ Databricks |
| ○ Python | ○ AWS Redshift | | ○ OpenAI |
| ○ Apache Spark | ○ AWS EMR | ○ Kubernetes | ○ Retool |
| ○ Apache Airflow | ○ AWS IAM | ○ Terraform | ○ Linux |

May 2017 **Full Stack Software Developer**, *Synoptic Technologies Ltd*

to Working Primarily on the Business Intelligence product Synoptica. Developing and designing the various
May 2019 components of the tools that make up Synoptica using web-scraping technologies, APIs, sentiment analysis,
(2 years, 1 NLP, machine learning and other techniques to evaluate and score businesses based on web presence, media
month) coverage, recruitment and a myriad of other indicators.

Primarily working on the back-end of the system and various components that make use of the following technologies (as well as additional unlisted):

- | | | | |
|--------------------|-----------------|----------------|--------------------|
| ○ Apache NiFi | ○ Elasticsearch | ○ Apache Spark | ○ gRPC |
| ○ Apache Cassandra | ○ Java 8 | ○ PostgreSQL | ○ Protocol Buffers |
| ○ HBase | ○ Vert.x 3 | ○ Python | ○ AWS |
| ○ Elasticsearch | ○ Spring | ○ Kotlin | ○ Linux |

Nov 2014 **Software Developer, BAE Systems Applied Intelligence**
to Worked on key, award winning, products and capabilities, using various technologies and programming
May 2017 languages including:
(2 years, 7 months)

○ Java 8	○ Apache Spark	○ HTML	○ Apache Tomcat
○ Cloudera Hadoop	○ Apache Kafka	○ Puppet	○ NodeJS
○ Elasticsearch	○ Apache NiFi	○ Spring	○ Linux
○ Scala	○ JavaScript	○ SQL	

Primarily worked on Big Data projects initially as part of the Big Data Team and subsequently part of the Data Engines/Processing group within the business on Cyber Threat related projects still leveraging the use of Big Data to detect threats in the Mid-space, that is detecting threats at a national scale. Projects included those designed to leverage open source data as well as proprietary data sources.

Also contributed to development, maintenance and, administration of internal development tools and systems including Jenkins, Nexus, SonarQube, GitLab, Docker, and virtual servers. (DevOps)

August 2012 **Software Developer, IDR Solutions**
to Worked on key products including a 100% Java based PDF library. Used industry standard technologies
September including:
2014
(2 years, 2 months)

○ Java 8	○ JUnit	○ GlassFish
○ JavaScript	○ Jenkins	○ Android

Also published several technical blog articles still available at: blog.idrsolutions.com/author/lyndon

Attended the JavaOne Conference in 2012 as an exhibitor and presented a short talk on usage of application servers, primarily focussing on GlassFish.

Education

University Graduated De Montfort University in 2014 with a First Class Honours in Computer Games Programming (Bsc.).
College A levels in Computing, Philosophy, Sociology, and a BTEC In IT.
GCSEs 10 GCSEs at A-C grade including English and Maths.

Interests

I like to spend my spare time reading both fiction and non-fiction, writing technical blog posts (available at lyndon.codes), gardening, cooking, running, but most importantly learning new things and working on personal projects. For example; I've been developing a Game Boy Emulator using the Rust programming language, exploring MCP and other LLM related projects, and learning how to play the ancient game of Go/Weichi/Baduk.
